

Provider: **Specialty Products Group**

Program: **Benefits of Impermeable Concrete & Permanent Impermeable Repair Materials**

Length: **60 Minutes**

AIA/CES, LU, HSW

Description: **This Program addresses the impact of traditional & impermeable concrete inside & outside the building envelope. It discusses methods to improve longevity and consequently sustainability of all concrete applications. It provides a solution to the moisture & flooring problems as well as water and damp proofing concrete. Techniques and materials used to permanently repair concrete are discussed.**

Learning Objectives: **After completion of this course, participants will be able to understand and identify solutions for common problems relating to:**

- **Improving IAQ/IEQ**
- **Moisture Sensitive coatings and adhesives (flooring) issues**
- **Water & damp proofing concrete**
- **Permanent concrete repairs**

How Taught: **The facilitator utilizes a PowerPoint presentation and hands on product demonstrations to provide an in-depth overview of the methodology of a variety of solutions. It will be an interactive session that encourages feedback and questions, presented in a generic fashion.**

Target Audience: **Architects, Structural & Civil engineers, Landscape Architects, contractors, owners, concrete professionals, DOT and other construction and design professionals. This program is in-depth technically while broken down into simple explanations and meets the needs of professionals at every experience level.**

Facilitator Qualifications: **All SPG facilitators have been trained in CES Guidelines and presentation skills. Facilitators are involved in day-to-day issues and are considered industry experts.**

Costs: **There is no cost to bring this program into your firm or chapter meeting.**
